Re: ANABEC Antimicrobial Treatment and Mold remediation projects of Hahn reconstruction projects on Sanibel and Captiva Islands.

Dear Bill:

I am writing this letter to thank you for the excellent services that you and your company provided Dan Hahn Custom Builders after the hurricanes of 2004.

Everyone was concerned with mold growth as a result from their homes being wet and without power for weeks. We needed an ally to calm the fears of our clients and prevent mold from getting established in the structures of the homes we reconstructed on Sanibel and Captiva.

You filled that need by providing technical information and excellent service to treat the structures and interior drywall surfaces with antimicrobial chemicals and when necessary, cut out and remove storm damaged building materials. Service Master provided reliable estimates and on time service which allowed us to stay on track with our construction schedules.

Although I personally do not look forward to another year of water and mold losses, I will not hesitate to call upon you and your company should the need arise. I would also recommend you to anyone who may need the kinds of services you provide.

Thank you for being part of the Dan Hahn team and helping us with the delivery of timely services to our customers as a result of the 2004 storms.

Sincerely,

Kevin J. Vertesch
Vice President
